Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Attorney took issue with the combination resulting in the handheld unit supplying power to the microcontroller/non-volatile memory of Zaudtke. Examiner indicated that regardless of what could be labeled as a main/sub-unit, the concept of supplying power externally (through USB as taught by Taguchi) is known in the art, and that further, Zaudtke specifically discloses the need (and a specific means) for receiving power while the computer is shut down, which Taguchi meets. Examiner indicated that he did not believe these concepts and the general concept of a portable unit for indicating failure is patentable.
